

# COMMUNITY 1st PROGRAM

## Field Advocate Expectations

### What is the Overall Purpose?

STN's standard, secure, and scalable platform model focused on a "Community First" approach and empowering FBOs and CBOs to collectively work together across their local communities to identify and address the barriers and threats related to community resilience and sustainability. Through the Community1st platform and mobile application, with a push of a button, FBOs and CBOs representatives will:

- Connect community members and families in need to community-based service providers with the capacity to provide an array of services required to assist the overall well-being of individuals and families.
- Advocate for and manage sustained community engagement through online interactions with past, current, and potential participants
- Leverage community assets and information and teach individuals the skills needed to facilitate their empowerment, self-advocacy being the ultimate goal.
- Track and analyze data to build capacity within faith-based organizations and communities to fulfill the basic needs of individuals and families.

### What are MY Responsibilities?

Critical to the success of our partnership is your role as a service advocate. Advocates from FBOs and CBOs will work collectively to reconstitute a sense of community and provide help and advocacy on behalf of community residents that are seeking services and support in times of need as follows: Engage and provide one-on-one navigation services to individuals each week to support COVID-19 vaccination access/appointments. Services will include, but are not limited to:

- Booking appointments, supporting individuals in finding a walk-up site, determining eligibility, or discussing fears, concerns, and barriers to getting the vaccine.
- Providing information for or setting up appropriate transportation for eligible New Yorkers to and from the vaccination site.
- Facilitating referrals/recommendations to other providers and community partners for individuals in need of other health or social services.

## How do I Collect Information?

Each advocate will be provided either a paper form or an electronic table for data collection. Regardless of the way you are collecting your results, the questions being asked to the participant are the same. Below, you can see the form used for collection.

**Engagement**
